

# **SB272 Catalog of Enterprise Systems**

---

## **Which Enterprise Systems are Covered by SB 272**

Governor Brown approved SB 272 in October 2015, addition section 6270.5 to the California Public Records Act (the “Act,” Government Code Sections 6250-6276.48). Section 6270.5 defines an enterprise system as a software application or computer system that collects, stores, exchanges, and analyzes information that the agency uses that is (1) a multi-departmental system or system that contains information collected about the public and (2) a system of record. A system of record means a system that serves as an original source of data within an agency. SB 272 requires that local agencies create a catalog of multi-departmental systems or systems containing information about the public that store original records, and the post the catalog on their website.

## **Which Systems are Excluded**

Enterprise systems do not include cyber security systems, infrastructure and mechanical control systems, or information that would reveal vulnerabilities to, or otherwise increase the potential for an attack on, a public agency’s IT system. Additionally, section 6270.5 does not automatically require disclosure of the specific records that the IT systems collect, store, exchange or analyze; however, the Act’s other provisions pertaining to disclosure of such records still apply.

Carmel Area Wastewater District - Enterprise System Catalog

System Vendor	System Product	Brief Statement of System's Purpose	General Description of Categories or Types of Data	Custodian	Frequency of Data Collection	Frequency of Data Update
