

SANTA RITA AND GUADALUPE STREETS PIPELINE REPLACEMENT PROJECT

INFORMATION MAILER

The Carmel Area Wastewater District (CAWD) is replacing approximately 1.6 miles of clay sewer pipeline in your neighborhood with modern high-density pipe. The existing alignments run through residential paved areas and unimproved easements.

The project, scheduled to begin in 2025, is part of CAWD's infrastructure upgrade program to replace aging infrastructure and provide improved sewer reliability for CAWD's customers in and around the project area.

P.O. Box 221428 | Carmel California 93922 | (831) 624-1248

PROJECT INFORMATION

Project Benefits

- Replace 75+ year old failing sewer mains
- Reduce risk of sewage leaks and spills
- Improve long-term reliability of the sewer system
- New private lateral "WYE" connections to mainline sewer

Project Status

CAWD is working on finalizing the engineering and construction plans for the project. Following a bidding process, the contractor will be selected in late 2024 with construction anticipated to begin in 2025.

Future outreach (including a community meeting) is being planned before construction starts to provide additional information to property owners, residents and the general public.

If you have questions, please email CAWD District Engineer Patrick Treanor at:
